## PROFESSIONAL SUMMARY

Highly motivated Machine Learning / AI Engineer focused on designing and implementing cutting-edge solutions to combat counterfeiting, product theft, and adulteration. Proven expertise in developing intelligent Agentic AI using LangChain/LangGraph, with a strong understanding of prompt engineering.

## TECHNOLOGIES

Back-End & Cloud Python, TensorFlow, PyTorch, Scikit-learn, XGBoost

AI & Machine LLMs; Prompt Design; LangChain/LangGraph for Intelligent Agentic AI; Retrieval-Augmented Generation; Embeddings and Vector Search (pgvector, Pinecone); Chunking and Indexing; Reranking; Function/Tool Calling; Benchmark Design

Front-End ReactJS, NextJS

DevOps & Agile CI/CD pipelines, Git, Code Reviews, Scrum

## EXPERIENCE

Machine Learning Engineer | Sproxil | California, US | Nov 2024 – Present

- Designed and implemented machine learning models for classification, regression, recommendation, NLP, computer vision, and other relevant tasks.
- Built data pipelines for feature extraction, model training, and evaluation.
- Optimized and fine-tuned models for accuracy, latency, and scalability.
- Collaborated with cross-functional teams to translate business requirements into AI solutions.
- Deployed models into production using frameworks like TensorFlow Serving, TorchServe, or cloud-based tools.
- Monitored and maintained model performance post-deployment, including retraining and versioning.

Lead Supervised Fine-Tuning (SFT) and Reinforcement Learning (RL) Engineer | Turing | California, US | Nov 2024 – Present

- Led the development of supervised fine-tuning and reinforcement learning for large language models, achieving top accuracy, latency, and reliability targets.
- Built training and evaluation pipelines with experiment tracking and a model registry; ensured reproducible runs and versioned artifacts.

Lead Product Engineer (Contract) | Edubanc (Sterling Bank Subsidiary) | Lagos, Nigeria | May 2024 – Present

- Designed end-to-end solution designs for Edubanc middleware: business requirements, architecture diagrams, and detailed build specs.
- Led the development of PayFlex loan product from conception to deployment, driving key features and integrations.

Software Engineer (Full Stack) | Heirs Holdings | Lagos, Nigeria | Oct 2023 – Nov 2024

- Optimized Converge ERP workflows for 40,000 employees across a \$6.9B portfolio, enhancing efficiency by 50%.
- Designed application modules for ERP workflows serving large internal user bases.

Solution Engineer (Full Stack) | DipoleDIAMOND | Lagos, Nigeria | Jan 2023 – Nov 2023

- Led a team to build chatbots for tier-one and tier-two banks, as well as corporate clients.

Software Engineer | The People Practice (Contract) | Remote (Lagos, Nigeria) | Oct 2023 – Dec 2023

- Designed and implemented 8 APIs to optimize HR Tech solution, improving search functionality and system performance by 35%.

Education:

Bachelor of Science, Biochemistry | University of Benin, Edo, Nigeria | 2013 – 2017

Certifications:

Introducing Generative AI with AWS (UDACITY) | 2025

AWS Educate Machine Learning Foundations (AWS) | 2025

Amazon Elastic Container Service (AWS ECS) | 2023
